

README for the 'dhua' package
(German Abbreviations Using Thin Space)
(C) Uwe Lueck 2011/09/16

'dhua.sty' provides commands for German phrase abbreviations such as 'd. h.' that are recommended to use a thin space - set-up commands '\newdhua' and '\newtwopartdhua' as well as commands for single cases (e.g., '\zB' for 'z. B.', to save you from typing 'z.\,B.'). Package options support generating PDF and HTML from the same source and automatical use of '\xspace'.

Das Paket 'dhua' bietet Befehle fuer mehrgliedrige Abkuerzungen, fuer die schmale Leerzeichen (Festabstaende) empfohlen werden (Duden, Wikipedia). In die englische Paketdokumentation sind deutsche Hinweise eingestreut.

KEYWORDS: German typography;
web typography, language support, macro programming

The files 'dhua.sty', 'dhua.pdf', 'dhua.cfg', 'dhua.tex' and the present 'README' file form one work redistributable and/or modifiable under the terms of the LaTeX Project Public License; either version 1.3c of the License, or any later version, see
